Birthday

26.04.1995

Residence permit

EU Citizen | Swiss B/G
Permit Eligible

Nationality

Romanian

Languages

Romanian - native (C2)

English - highly proficient
(C1)

Deutsch - continuing
studies - Beginner (A2)

Personal Project

Claere is a platform built
around authentic long-
form personal storytelling,
with focus around privacy

Skills

Atlassian Platform (Jira,
JSM, Assets, Confluence)

Summary

With 6 years of experience in IT, I have always been interested in improving how things work. During my time at DeepL, working more closely with business teams showed me that good solutions start with understanding *why before deciding how*. That experience motivated me to pursue a **Bachelor's in Business Information Technology at University of Applied Sciences Northwestern Switzerland in Basel**, where I will begin my studies in September 2026.

I am therefore seeking opportunities in **Basel, Zurich**, or within commuting distance of Basel.

Work experience

IT Support & Platform Specialist, DeepL SE

May 2023 - Today / Cologne, Germany

- **Redesigned** internal **service portals** used across the company – applied **ITSM** and **behavioural psychology** research to replace legacy ticket categories with intent-based request forms for IT Support, and used **AI-assisted analysis** of ticket volumes and categories to drive continuous improvement for other internal support functions.
- Administered DeepL's **Atlassian platform** across 150+ internal projects, building multiple automation and workflows that supported approvals, compliance processes, and service delivery for teams across the organization.
- Owned the **design** of a centralized software asset inventory in **Jira Assets (CMDB)**, defining the asset model, evaluating implementation approaches, and working with **cross-functional stakeholders** to support software **governance** and **procurement** decisions.
- Played a leading role the **Asana-to-Jira** migration for 7 teams (~80 users) over 3 months – from **stakeholder consultation** and tool evaluation through data migration and **post-migration training**, successfully moving 6 of 7 teams.
- Investigated **cross-platform incidents** (identity, email, cloud, Atlassian) with **root cause analysis**, coordinating remediation across infrastructure and platform teams.
- Supported **team growth and operational efficiency** by contributing to 10+ hiring interviews for IT Support and Atlassian Admin roles, and managing **vendor relationships** alongside budget planning input.
- Maintained **4.9/5 CSAT** across 2,000+ tickets resolved with a 6-hour average first response, **supporting a 1,200+** employee environment via Jira and the company-wide Slack support channel.

IT Support Specialist, Morningstar GmbH

May 2021 - April 2023 / Frankfurt am Main, Germany

- Owned regional IT support for **six offices across Germany, Switzerland, Sweden and Denmark** as the POC, and created the first **knowledge base documenting** setup and procedures for the regional offices.
- **Coordinated** directly between local users and global infrastructure teams — **escalating regional issues upstream** and managing **infrastructure-driven changes** back to local offices.
- **Led local diagnosis** during incidents affecting the regional offices, working with **global infrastructure** teams on **root cause analysis** and remediation.
- Participated in the Citrix-to-AWS migration as a pre-rollout tester, then owned post-rollout support for Frankfurt and London — including training ~100 users in sessions built around early ticket patterns.
- Executed hardware and software **asset lifecycle for ~500** regional assets — including procurement, audits, device rebuilds, and end-of-life handling.

IT Support Specialist, Cognizant SoftVision

October 2019 - April 2021 / Bucharest, Romania

- Delivered on-site IT support for ~70 developers across two Bucharest offices, maintaining **ticket resolution above 90%** within SLA through Jira Service Management.
- Managed **user provisioning** and access control through **Active Directory** — including onboarding, offboarding, and ongoing permission changes.
- Created and maintained **technical documentation** and support procedures in Confluence — **standardizing recurring fixes** and reducing dependency on individual team members.

IT Help Desk Agent, TSG Romania

November 2018 - October 2019 / Bucharest, Romania

- Delivered remote technical support for petrol stations across Romania and Moldova, **resolving approximately 80% of incidents at first contact**.
- Supported a multi-system environment including POS terminals, pump controllers, station networking, and office computers — diagnosing issues over phone and remote tools.
- Escalated complex incidents to L2 teams and worked with on-site technicians to coordinate remediation.

Education

BSc Business Information Technology, FHNW University of Applied Sciences
Northwestern Switzerland

Basel, Switzerland | Starting in September 2026

BA Romanian and English Language and Literature, Hyperion University

2016 - 2019 / Bucharest, Romania
